Company Information

The directors of the company are as follows:

Oliver Fowler

Neil Cuthbert

Richard Robinow

Stephen Waruhiu

Brown Ondego

Secretary and registered office

lan Hodson, Certified Public Secretary (Kenya), 1st Floor, Block D, Wilson Business Park, P.O. Box 17648, Nairobi 00500

Registrars and transfer office

Custody and Registrars Services Limited, IKM Place, Tower B, 1st Floor, 5th Ngong Avenue, P.O. Box 8484, Nairobi 00100

Independent auditors

Deloitte & Touche, Certified Public Accountants (Kenya), Deloitte Place, Waiyaki Way, Muthangari, P.O. Box 40092, Nairobi 00100

Principal Bankers

NCBA Bank Kenya Plc Upper Hill, P.O. Box 30437, Nairobi 00100

Absa Bank Kenya Plc P.O. Box 30120, Nairobi 00100

National Bank of Commerce Limited P.O. Box 1863, Dar-es-Salaam Tanzania

Advocates

Kaplan & Stratton, Williamson House, 4th Ngong Avenue, P.O. Box 40111, Nairobi 00100

Notice of the Annual Meeting

Notice is hereby given that the Twenty Eighth Annual General Meeting of the Shareholders of REA Vipingo Plantations Limited will be held via electronic means on Friday, 31st March, 2023 at 11.00 a.m. for the following purposes:

ORDINARY BUSINESS

- 1. Constitution of the Meeting and confirmation of a Quorum.
- 2. To receive and consider, and if thought fit, adopt the company's annual report and financial statements for the year ended 30 September 2022 together with the Auditor's Report thereon.
- To confirm the payment of an interim dividend amounting to Shs 4.00 per share (80%) and to confirm the recommendation of the directors that no final dividend be paid in respect of the year ended 30th September 2022.
- 4. To elect directors in accordance with the company's Articles of Association.

Director retiring by rotation

Mr. Oliver Fowler retires by rotation and, being eligible, offers himself for reelection in accordance with Article 82 (c) of the Articles of Association.

- 5. To approve the directors' remuneration for the year ending 30 September 2023.
- 6. To note that Deloitte & Touche LLP will continue in office as auditors of the company in accordance with the provisions of section 721 (2) of the Kenyan Companies Act, 2015 and to authorize the directors to fix the auditor's remuneration for the ensuing financial year in accordance with section 724 (1) of the Kenvan Companies Act. 2015.

BY ORDER OF THE BOARD

Company Secretary, P.O. Box 17648 - 00500, Nairobi.

8 February 2023

Notes

- 1. The Annual General Meeting will be held by electronic means in accordance with the provisions of the Kenyan Companies Act, 2015 as amended by the Business Laws (Amendment) (No.2) Act,2021.
- 2. Shareholders wishing to participate in the meeting should register for the AGM online at https://digital.candrgroup.co.ke or via a link to the AGM Platform that will be sent to them via SMS and/or email. In order to complete the registration process, shareholders will need to have their ID/Passport Numbers which were used to purchase their shares and/or their Share Account Number at hand. For assistance shareholders should dial the following helpline number: +254 20 8690360 from 8:00 a.m. to 4:00 p.m. from Monday to Friday during the registration open period.
- Registration for the AGM opens on 23rd March 2023 at 08:00 a.m. and closes on 30th March 2023 at 11:00 a.m. Shareholders will not be able to register after 30th March 2023 at 11:00 a.m.
- 4. In accordance with Section 283(2)(c) of the Kenyan Companies Act, 2015, the following documents may be viewed on the Company's website at https://reavipingo.com
 - (i) a copy of this Notice and the proxy form;
 - (ii) the Company's Annual Report and Audited Financial Statements for the year
- 5. Shareholders can access the Virtual AGM via a link to the AGM Platform or using their log in credentials via https://digital.candrgroup.co.ke to view the livestream and vote and ask questions.
- Shareholders wishing to raise any questions for the AGM may do prior to the AGM (during the registration open period) or during the AGM by:

Prior to AGM

i) Accessing Virtual AGM via a link to the AGM Platform or via https://digital. candrgroup.co.ke; Select Attend Event; Select "REA VIPINGO AGM" in the profile account; Select Q&A option tab on the live stream display section and submit questions in text box provided; or

During AGM

- ii) Follow the process as above: or
- iii) Sending their written questions by email to digital@candrgroup.co.ke; or
- iv) Physically delivering their written questions with a return physical address or email address to the registered office of the Company at 1st Floor Block D, Wilson Business Park, Wilson Airport, Nairobi; or

- v) Sending their written questions with a return physical address or email address by registered post to the Company's address at P. O. Box 17648-00500 Nairobi.
 - · Shareholders sending questions by email or delivering to the Company must provide their full details (full names, Shares Account Number) when submitting their questions and clarifications. Also attach a copy of your ID/Passport.
 - All questions and clarification must reach the Company on or before 30th March 2023 at 11:00 am.
 - Following receipt of the questions and clarifications, the directors of the Company shall provide written responses to the questions received to the return physical address or email address provided by the Shareholder no later than 24 hours before the start of the general meeting
 - A full list of all questions received and the answers thereto will be published on the Company's website not later than 3 days after the end of the
- Shareholders wishing to vote may do so prior to the AGM (during the registration $\,$ open period) or during the AGM by:

Prior to AGM

vi) Shareholders accessing Virtual AGM via a link to the AGM Platform or via https://digital.candrgroup.co.ke platform; Select Attend Event; Select "REA VIPINGO AGM" in the profile account; Select Voting Matters option tab on the live stream display section and vote on each resolution using the drop down menu; or

During AGM

- vii) Follow the process as above
- In accordance with section 298(1) of the Kenvan Companies Act, shareholders entitled to attend and vote at the AGM are entitled to appoint a proxy to vote on their behalf. A proxy need not be a member of the Company but if not the Chairman of the AGM, the appointed proxy will need access to a wi-fi enabled

A proxy form is attached to this Notice and is available on the Company's website via this link: https://reavipingo.com. Physical copies of the proxy form are also available at the following address: Custody & Registrars, 1st Floor, Tower B, IKM Place, 5th Ngong Avenue, Nairobi.

A proxy must be signed by the appointor or his attorney duly authorized in writing. If the appointer is a body corporate, the instrument appointing the proxy shall be given under its common seal or under the hand of an officer or duly authorized attorney of such body corporate. A completed form of proxy should be emailed to proxy@candrgroup.co.ke or delivered to Custody & Registrars offices at 1st Floor, Tower B, IKM Place,5th Ngong Avenue, Nairobi, so as to be received not later than Wednesday 29th March 2023 at 11.00 a.m. Any shareholder appointing a proxy must provide the phone number and e-mail address of the proxy on the proxy form. Any proxy registration that is rejected will be communicated to the shareholder concerned no later than Thursday 30th March 2023 at 11:00 am to allow time to address any issues prior to the AGM.

- All proxies will be contacted and guided on how to register for the AGM. For further assistance, Proxies may call following helpline number: (+254) 20 8690360 from 8:00 a.m. to 4:00 p.m. from Monday to Friday during the registration open
- 10. The AGM will be streamed live via the C&R Digital Services platform. Duly registered shareholders and proxies will receive a short message service (SMS/ USSD) prompt on their registered mobile numbers or email two hours ahead of the AGM reminding them that the AGM will begin in two hours time.
- 11. Duly registered shareholders and proxies may follow the proceedings of the AGM using the live stream platform. Duly registered shareholders and proxies may vote (when prompted by the Chairman) for resolutions on the Voting Matters tab on the live stream display screen.
- 12. Results of the AGM shall be published 24 hours following the conclusion of the
- 13. The preferred method of paying dividends which are below Kshs 140,000.00 is through M-PESA. Shareholders who wish to receive their dividend through M-PESA and who have not registered for this mode of payment can opt to receive future dividends via M-PESA by dialling *483*038# or contacting the Share Registrar, Custody & Registrars Services Limited.
- 14. All present and former shareholders of the Company are hereby notified that pursuant to the provisions of the Unclaimed Financial Assets Act No 40 of 2011 Parts II and III. dividends and shares which have not been claimed for a period of three (3) years or more will require to be delivered to the Unclaimed Financial Assets Authority ('the Authority) as abandoned assets on the appointed date. Therefore, all shareholders with previous unpaid dividends are requested to urgently contact the Share Registrar, Custody & Registrars Services Limited at IKM Place, Tower B, 1st Floor 5th Ngong Avenue, Nairobi; Tel: Mobile 020 7608216 Email: info@candrgroup.co.ke to claim any unpaid dividends to avert the risk of the dividends being forwarded to the Authority.

Chairman's statement

East Africa has suffered from several consecutive years of below average rainfall with 2021 being one of the driest on record, particularly along the coastal strip where four of our five sisal estates are located. The dry conditions persisted on these estates through until April 2022 resulting in production having to be restricted for most of the first half of the financial year.

Although the coastal estates did receive good and quite well distributed rain from May through to September, overall fibre production in Tanzania was 10.75% below the previous year at 6,778 tonnes with a high percentage of this being sub standard grade fibre. A similar situation was experienced at Vipingo where the grade mix was also poor and overall fibre production 14.28% down on the previous financial period at 3,728 tonnes.

Dwa, our largest estate, had a reasonable start to the year but, from April through to September received virtually no rainfall at all and production was restricted during the latter part of this period. Total fibre production at Dwa was 9.3% below the previous period at 6,226 tonnes.

Although overall fibre production across the group was 11% below 2020/2021 at 16,731 tonnes, and turnover 4% down at Shs 3.63 billion, group profit before tax increased by 37% to Shs 768 million. This includes a net gain from changes in fair value of biological assets of Shs 170.92 million (2021: Shs 21.16 million) but otherwise was largely a result of fibre prices, in dollar terms, remaining at good levels and the strength in the dollar providing better shilling earnings, particularly in Kenya.

The Tanga spinning mill had a difficult year with overall sales volumes declining 30.64% to 1,203 tonnes. Sales into the local regional markets were particularly badly impacted by the strength of the dollar and the drought.

The Dwa horticulture division had a good year with baby corn volumes remaining at acceptable levels and the seed business continuing to mature. The Dwa biomass energy generating plant has been ready for commissioning for quite some time but, due to the well published problems at Kenya Power and Lighting Company Plc (KPLC) and the appointment in March 2021 of a Taskforce to examine all Power Purchase Agreements entered into by KPLC, the commissioning of the plant has been further delayed. The new Kenya government elected in August 2022 have brought in new people at KPLC and the energy sector generally, and it is to be hoped that the plant can be activated soon.

Vipingo estate continues, following the sale and lease back of land some years ago, to operate normally and some 142 hectares of new sisal was planted during the year. Inevitably as the owners of the land, Centum Investment Company Limited, develop and sell land, the areas available to the group for replanting in the future will diminish and fibre production will, as expected, reduce over time.

Dwa estate has had satisfactory rainfall in November and December 2022, as have the Tanzanian estates, and all are well set, providing some reasonable rain is received from April, to meet production targets. Vipingo estate has not, unfortunately, received much rain since August and is again dry.

The sisal fibre market situation is a little mixed with good demand in some areas and challenges in others. It is to be hoped that the reversal of the Chinese government's zero covid policy will result in more activity in their industrial sector leading to demand for sisal fibre returning to close to pre-covid pandemic volumes.

On behalf of the board, I would like to record my appreciation to all the group's staff for their excellent efforts and continued support throughout the year.

Oliver Fowler Chairman 8 February 2023

Report of the directors

The directors present their report together with the audited financial statements of the company and its subsidiaries for the year ended 30 September 2022, in accordance with Section 653 (i) of the Kenyan Companies Act, 2015, which disclose the state of affairs of the group and the company.

Incorporation and registered office

The company is incorporated in Kenya under the Kenyan Companies Act, 2015 as a limited liability public company and is domiciled in Kenya. The address of the registered office is shown on page 2.

Principal activities

The company is engaged in the cultivation of sisal and the production of sisal fibre and also acts as a holding company. The principal businesses of the subsidiary companies comprise the cultivation and production of sisal and horticultural produce, manufacture of sisal yarns and twines, sisal export and provision of sisal warehousing and export services.

Results

The results of the group for the year are set out in the consolidated statement of profit or loss and other comprehensive income on pages 12-13.

Business Review

Overall the group had a fair year given the challenges associated with several years of below average rainfall on all group estates. Group total sisal fibre production was 16,731 tonnes, 11% less than the previous year's production of 18,807 tonnes. The volume of spun product produced by the Tanga spinning mill was also lower than previous years at 1,203 tonnes (2021: 1,733 tonnes).

Despite the uncertain conditions in the international market caused by China's zero covid policy, the war in Europe and the strong US dollar, the currency that we trade in, the group was fairly well sold throughout the year.

Information relating to the individual operating units is given below. Areas are given as at 30 September 2022 and crops are stated for the whole year ended on that date and referred to as the 2022 crop year.

Dwa

The Dwa Estate is situated at Kibwezi, some 200 kilometres from Nairobi, just north of the Nairobi/ Mombasa highway. The estate covers an area of 8,957 hectares made up as follows:

	Hectares
Mature sisal	3,356
Older sisal	339
Immature sisal	1,660
Nurseries	99
Other areas	3,392
Horticulture	111
	8,957

Overall rainfall at Dwa during the year was below average for the second successive year and, as a result, just 6,226 tonnes of fibre was baled (2021: 6,865 tonnes). The dry conditions also resulted in the estate producing a large amount of low grade fibre.

The annual replant at Dwa is carried out, in the main, prior to the November rains, which are historically the more reliable in the area and, during 2022, some 550 hectares of new sisal was planted. It is intended that going forward Dwa will continue to replant at around this level.

The rains during November and December 2022 have been fair and, providing that the estate receives some reasonable rainfall in April, should meet its production targets during the current year.

Horticulture

The Dwa horticulture activities are based around two centres, a pivot irrigation system on the main estate near to the sisal factory and around 300 acres of leased land on the Athi River, near to the estate.

The horticulture section was developed around the production of baby corn which is sold to some of the large export-based horticulture producers. In recent years Dwa has also successfully developed a seed production business which had a good season and is expected to expand in 2023. This forms the back-bone of Dwa's non-sisal agricultural activities.

Report of the directors (continued)

Business Review (continued)

Dwa (continued)

Biomass Energy Generation

The biomass power generation plant, whose construction commenced several years ago, has been ready for commissioning for some time but, due to the well published problems that Kenya Power and Lighting Company Plc (KPLC) has had, and the subsequent establishment of a Presidential Taskforce to examine all Power Purchase Agreements (PPA) entered into by KPLC with Independent Power Producers like ourselves, the commissioning of the plant has been further delayed. It is hoped that the PPA will be reactivated shortly enabling commissioning to commence.

Vipingo

The Vipingo estate is situated on the Kenya coast, some 30 kilometres north of Mombasa.

The original land holding was 4,279 hectares. In accordance with the agreement entered into with Centum Investment Company Limited in 2015, 203 hectares has subsequently been surrendered. The remaining 4,076 hectares of land, which is leased from Centum Investment Company Limited, is utilised as follows:

	Hectares
Mature sisal	1,882
Older sisal	848
Immature sisal	482
Nurseries	49
Other areas	815
	4,076

The first half of the financial period was very dry at Vipingo and this after an unusually dry 2021. As a consequence, the estate operated for several months on a reduced cutting and production regime but, fortunately from April through to the end of September, the estate benefited from some good, well distributed rainfall and ended the year with a fibre production of 3,728 tonnes (2021: 4,349 tonnes).

Due to the drought conditions experienced during 2021, Vipingo's nurseries did not develop well and the annual

replant, which is normally carried out prior to the April rains, was delayed to August/September when some 142 hectares of new sisal was planted.

The estate has had little rain since the start of the current financial period and so is in need of good rains from April 2023 to achieve targets.

Amboni Plantations Limited

The Amboni estates comprise three separate properties, namely the Mwera, Sakura and Kigombe estates, situated south of Tanga on the Tanzanian coast.

The Mwera and Sakura estates are adjacent to each other just to the south of the Pangani river some 60 kms south of Tanga. The Mwera estate is the operational centre for the Tanzanian business and has extensive workshop and other support facilities.

The Kigombe estate is conveniently situated just to the north of the Pangani river and approximately mid way between Mwera estate and the port of Tanga from where the group's fibre is exported.

The Tanzanian estates cover an area of 15,330 hectares made up as follows:

	Hectares
Mature sisal	3,872
Older sisal	1,037
Immature sisal	1,518
Nurseries	127
Other areas	8,776
	15,330

Like Vipingo, the Tanzanian estates are located on the coastal strip and also suffered from a very dry year in 2021. Fortunately, however, rainfall was good from May 2022 onwards and production improved during the latter part of the financial period. A total of 6,778 tonnes was produced (2021:7,593 tonnes), significantly lower than previous years.

Replanting in Tanzania is largely carried out prior to the April rains and in 2022 a total area of 565 hectares were planted, with a similar area planned for 2023.

Rainfall since the start of the new financial period has been reasonable, and the leaf position overall remains satisfactory, and so production is expected to remain at reasonable levels for some months at least.

Report of the directors (continued)

Business Review (continued)

Amboni Spinning Mill Limited

The Tanga spinning mill, situated on the outskirts of Tanga town, produces sisal yarns, twine and ropes which are sold both regionally and internationally.

Sales into both the regional and international markets declined materially during the year with total sales and production reducing to 1,203 tonnes (2021: 1,733 tonnes). Sales within East Africa were affected by the relative strength of the Tanzanian shilling to the Kenyan and Ugandan shillings, as well as the drought that has prevailed over much of the region for an extended period.

The international market for yarns and ropes is highly competitive with margins remaining tight. Overall there seems to be little prospect of the mill making a better contribution in the foreseeable future.

Marketing

Exported sisal fibre and products from the group's estates and the Tanga spinning mill have, since the formation of the group, been sold to a related company, Wigglesworth & Company Limited, and this arrangement continued through the year to 30 September 2022. Wigglesworth & Company Limited, which is a leading international sisal merchant, continued to develop the existing traditional markets for the group products and to exploit further the developing niche markets for the quality fibre and yarns that the group is able to produce.

Dividends

During the year an interim dividend of Shs 4 per share amounting to Shs 240,000,000 was declared and paid (2021: Shs 900,000,000).

The directors do not recommend the payment of a final dividend in respect of the year ended 30th September 2022 (2021: Shs Nil).

Directors

The directors who held office during the year and to the date of this report were:

O M Fowler	Kenyan	(Chairman)
N R Cuthbert	British	(Managing)
R M Robinow	British	
S N Waruhiu	Kenyan	
B M M Ondego	Kenyan	

Director's statement as to the information given to the auditors

The directors confirm that with respect to each director at the time of approval of this report.

- There was, as far as each director is aware, no relevant audit information of which the group's and company's auditor are unaware; and
- b) Each director had taken all steps that ought to have been taken as a director so as to be aware of any relevant audit information and to establish that the group's and company's auditor are aware of that information.

Auditors

Deloitte & Touche LLP, having confirmed their willingness, continue in office in accordance with section 721 (2) of the Kenyan Companies Act, 2015. The directors monitor the effectiveness, objectivity and independence of the auditor. The directors also approve the annual audit engagement contract, which sets out the terms of the auditor's appointment and the related fees.

By order of the Board I R HODSON Secretary 8 February 2023

Statement of directors' responsibilities

The Kenyan Companies Act, 2015 requires the Directors to prepare financial statements for each financial year that give a true and fair view of the financial position of the group and of the company as at the end of the financial year and of their profit or loss for that year. It also requires the directors to ensure that the parent company and its subsidiaries maintain proper accounting records that are sufficient to show and explain the transactions of the company and its subsidiaries and disclose, with reasonable accuracy, the financial position of the group and company. The Directors are also responsible for safeguarding the assets of the group, and for taking reasonable steps for the prevention and detection of fraud and error.

The Directors accept responsibility for the preparation and presentation of these financial statements in accordance with International Financial Reporting Standards, and in the manner required by the Kenyan Companies Act, 2015. They also accept responsibility for:

- (i) Designing, implementing and maintaining such internal control as they determine necessary to enable the presentation of financial statements that are free from material misstatement, whether due to fraud or error;
- (ii) Selecting suitable accounting policies and applying them consistently; and
- (iii) Making accounting estimates and judgements that are reasonable in the circumstances.

Having made an assessment of the company and its subsidiaries ability to continue as going concerns, the directors are not aware of any material uncertainties related to events or conditions that may cast doubt upon the company and its subsidiaries ability to continue as going concerns.

The directors acknowledge that the independent audit of the financial statements does not relieve them of their responsibilities.

Approved by the board of directors on 8 February 2023 and signed on its behalf by:

N.R. Cuthbert Director

O.M. Fowler Director

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF REA VIPINGO PLANTATIONS LIMITED

Report on the Audit of the Consolidated and Company financial statements

Opinion

We have audited the accompanying financial statements of REA Vipingo Plantations Limited (the "Company") and its subsidiaries (together the "Group") set out on pages 12 to 86, which comprise the consolidated and company statements of financial position as at 30 September 2022 and the consolidated and company statements of profit or loss and other comprehensive income, consolidated and company statements of changes in equity and consolidated and company statements of cash flows for the year then ended, and notes to the financial statements including a summary of significant accounting policies.

In our opinion, the financial statements present fairly in all material respects, the financial position of the Group and of the Company at 30 September 2022 and of their financial performance and consolidated and separate cash flows for the year then ended in accordance with International Financial Reporting Standards ("IFRSs") and the requirements of Kenyan Companies Act, 2015.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing ("ISAs"). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), together with other ethical requirements that are relevant to our audit of the financial statements in Kenya, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The directors are responsible for the other information. The other information comprises the Chairman's statement, Report of the directors and the Statement of directors' responsibilities which were obtained prior to the date of our report. The other information does not include the consolidated and company financial statements and our auditor's report thereon.

Our opinion on the consolidated and company financial statements does not cover the other information and we do not express any form of assurance conclusion thereon. In connection with our audit of the consolidated and company financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and company financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF REA VIPINGO PLANTATIONS LIMITED (Continued)

Report on the Audit of the Consolidated and Company financial statements (continued)

Responsibilities of the Directors and Those Charged with Governance for the Financial Statements

The Directors are responsible for the preparation and fair presentation of the consolidated and company financial statements in accordance with International Financial Reporting Standards and the requirements of the Kenyan Companies Act, 2015 and for such internal controls as the directors determine are necessary to enable the preparation of the consolidated and company financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and company financial statements, the directors are responsible for assessing the Group's and Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group and/or Company or to cease operations, or have no realistic alternative but to do so. Those charged with governance are responsible for overseeing the Company's and its subsidiaries financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and company financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and Company's internal controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Directors.
- of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company and its subsidiaries ability to continue as going concerns. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company and its subsidiaries to cease to continue as going concerns.

INDEPENDENT AUDITORS' REPORT TO THE MEMBERS OF REA VIPINGO PLANTATIONS LIMITED (Continued)

Report on the Audit of the Consolidated and Company financial statements (continued)

Auditor's Responsibilities for the Audit of the Financial Statements (Continued)

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entity or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the Group audit. We remain solely responsible for our audit opinion.

We communicate with Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on other matters prescribed by the Kenyan Companies Act, 2015

In our opinion the information given in the report of the directors on pages 5 to 7 is consistent with the consolidated and company financial statements.

The engagement partner responsible for the audit resulting in this independent auditor's report is **CPA Iqbal Karim, practicing certificate No. 1895.**

For and on behalf of Deloitte & Touche LLP Certified Public Accountants (Kenya) Nairobi 8 February 2023

The translation deficit represents the cumulative position of translation gains and losses arising from the conversion of the net assets of the foreign subsidiary companies, and also the long term loan to a subsidiary company, to the reporting currency.

The employee benefit reserve represents the cumulative position, after tax, of movements in the defined benefit retirement scheme asset which have been recognised in the statement of other comprehensive income.

Notes to the consolidated financial statements

1. General information

REA Vipingo Plantations Limited (the company) is incorporated in Kenya under the Kenyan Companies Act as a limited liability public company and is domiciled in Kenya. The address of the registered office is:

1st Floor, Block D Wilson Business Park P.O. Box 17648-00500 Nairobi Kenya

The company is engaged in the cultivation of sisal and the production of sisal fibre and horticultural produce and also acts as a holding company. The principal activities of the subsidiary companies (the group) are described in note 17.

2. Accounting policies

Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS). For Kenyan Companies Act reporting requirements, in these financial statements the balance sheet is equivalent to the statement of financial position and the profit and loss account is presented in the statement of profit or loss and other comprehensive income.

Basis of preparation

The financial statements have been prepared under the historical cost convention except where otherwise stated in the accounting policies below. The principal accounting policies adopted in the preparation of these financial statements remain unchanged from the previous year and are set out below.

The financial statements are presented in the functional currency, Kenya Shillings, rounded to the nearest thousand (Shs'000).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates and assumptions. It also requires directors to exercise their judgement in the process of applying the accounting policies adopted by the group. Although such estimates and assumptions are based on the information available to the directors, actual results may differ from those estimates. The judgements and estimates are

reviewed at the end of each reporting period and any revisions to such estimates are recognised in the year in which the revision is made. The areas involving a higher degree of judgement or complexity or where assumptions and estimates are significant to the financial statements are disclosed in Note 3.

Adoption of new and revised International Financial Reporting Standards (IFRSs) and Interpretations

(i) Relevant new standards and amendments to published standards effective for the year ended 30 September 2022

There were no new standards or amendments to published standards which became effective during the year ended 30 September 2022 and which were relevant to the Group and Company.

(ii) Relevant new and amended standards and interpretations in issue but not yet effective and which have not been early adopted by the Group and Company.

New and Amendments to standards

Amendments to IAS
16 Property, plant and
equipment – Proceeds
before intended use.
Amendments to IAS 37
Onerous Contracts – Cost
of fulfilling a Contract.
Amendments to IAS 1 and
IFRS practice statement 2
Disclosure of accounting
policies.

Amendments to IAS 8 Definition of accounting estimates

Annual Improvements to IFRSs 2018-2020 cycle which included amendments to IAS 41 Agriculture.

Amendment to IAS 12 Income taxes

Amendments to IAS 1 Classification of liabilities as current or non-current.

Effective for annual periods beginning on or after

1 January 2022, with earlier application permitted.

1 January 2022, with earlier application permitted.

1 January 2023, with earlier application permitted.

1 January 2023, with earlier application permitted.

1 January 2022, with earlier application permitted.

1 January 2023, with earlier application permitted

1 January 2024, with earlier application permitted.

2. Accounting policies (continued)

Adoption of new and revised International Financial Reporting Standards (IFRSs) and Interpretations (continued)

The directors do not anticipate that the adoption of the Standards listed above will have a material impact on the financial statements of the Group and Company in future periods, except as noted below.

(iii) Impact of relevant new and amended standards and interpretations on the financial statements in issue but not yet effective

Amendments to IAS 16 Property, Plant and Equipment: Proceeds before intended use

This amends the standard to prohibit deducting from the cost of an item of property, plant and equipment any proceeds from selling items produced while bringing that asset to the location and condition necessary for it to be capable of operating in the manner intended by management. Instead, an entity recognises the proceeds from selling such items, and the cost of producing those items, in profit or loss.

An entity applies the amendments retrospectively only to items of property, plant and equipment that are brought to the location and condition necessary for them to be capable of operating in the manner intended by management on or after the beginning of the earliest period presented in the financial statements in which the entity first applies the amendments.

The directors do not expect that the adoption of the amendments will have a material impact on the financial statements of the Group and Company.

Amendments to IAS 37 Onerous Contracts – Cost of fulfilling a Contract

The amendments clarify that the direct costs of fulfilling a contract include both the incremental costs of fulfilling the contract and an allocation of other costs directly related to fulfilling contracts. Before recognising a separate provision for an onerous contract, the entity recognises any impairment loss that has occurred to assets used in fulfilling the contract.

The directors do not expect that the adoption of the

amendments will have a material impact on the financial statements of the Group and Company.

Amendments to IAS 1 and IFRS Practice Statements 2 Disclosure of Accounting Policies

The amendments require that an entity discloses its material accounting policies, instead of its significant accounting policies. Further amendments explain how an entity can identify a material accounting policy and provides examples of when an accounting policy is likely to be material.

The directors do not expect that the adoption of the amendments will have a material impact on the financial statements of the Group and Company.

Amendments to IAS 8 Definition of accounting estimates

The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty".

Entities develop accounting estimates if accounting policies require items in financial statements to be measured in a way that involves measurement uncertainty. The amendments clarify that a change in accounting estimate that results from new information or new development is not the correction of an error.

The directors do not expect that the adoption of the amendments will have a material impact on the financial statements of the Group and Company.

Annual Improvements to IFRS Standards 2018-2020

The Annual Improvements include an amendment to IAS 41 Agriculture. The amendment removes the requirement in paragraph 22 of IAS 41 that entities exclude cash flows for taxation when measuring the fair value of assets within the scope of IAS 41 by using a present value technique.

The directors are currently assessing the impact which this amendment may have on the financial statements of the Group and Company.

2. Accounting policies (continued)

Amendments to IAS 12 Income Taxes

The amendments require recognition of deferred tax upon transactions, including the recognition of right of use assets and lease liabilities that, upon initial recognition, give rise to equal amounts of taxable and deductible temporary differences.

The directors anticipate that the application of these amendments may have an impact on the financial statements of the Group and Company in future periods should such transactions arise.

Amendments to IAS 1 Classification of Liabilities as Current or Non-current

The Amendments clarify that the classification of liabilities as either current or non-current depends upon the rights that exist at the end of the reporting period and is unaffected by events which occur, or are expected to occur, after the reporting date. The definition of "settlement" of a liability has also been clarified.

The directors do not expect that the adoption of the amendments will have a material impact on the financial statements of the Group and Company.

Consolidation

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its policy over the entity. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

Acquisitions of subsidiaries by the group are accounted for using the acquisition method. The cost of the business combination is measured as the aggregate of the fair values of assets given, liabilities incurred or assumed and equity instruments issued by the group at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are recognised at their fair values at the acquisition date. Goodwill

arising on acquisition is recognised as an asset and is measured at cost, being the excess of the cost of acquisition over the net fair value of the group's interest in the identifiable assets, liabilities and contingent liabilities recognised. If the net fair value of the group's interest in the acquired identifiable assets, liabilities and contingent liabilities exceeds the cost of acquisition, the excess is recognised immediately in profit or loss.

Costs related to acquisitions are expensed as incurred.

All inter-company transactions, balances and unrealised surpluses and deficits on transactions between the group companies are eliminated on consolidation.

A list of subsidiary companies is shown in Note 17.

Functional currency and translation of foreign currencies

Functional and presentation currency

Items included in the financial statements of each of the group's subsidiaries are measured using the currency of the primary economic environment in which the subsidiary operates (the "functional currency"). The consolidated financial statements are presented in thousands of Kenya Shillings, which is also the functional currency of the parent company.

Transactions and balances

Transactions in foreign currencies during the year are translated into the functional currency at rates ruling at the transaction dates. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated. Gains and losses on exchange are recognised in profit or loss.

Consolidation

The results and financial position of all subsidiary companies (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the group's presentation currency are translated into the presentation currency as follows:

2. Accounting policies (continued)

Functional currency and translation of foreign currencies (continued)

Consolidation (continued)

- (a) Assets and liabilities for each statement of financial position presented (i.e. including comparatives) are translated at the closing rate at the date of that statement of financial position;
- (b) Income and expenses for each statement of comprehensive income or separate income statement presented (i.e. including comparatives) are translated at exchange rates at the dates of the transactions; and
- (c) All resulting exchange differences are recognised in other comprehensive income

Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. This condition is regarded as met only when the asset (or disposal group) is available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such asset (or disposal group) and its sale is highly probable. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

When the Group is committed to a sale plan involving loss of control of a subsidiary, all of the assets and liabilities of that subsidiary are classified as held for sale when the criteria described above are met, regardless of whether the Group will retain a non-controlling interest in its former subsidiary after the sale.

When the Group is committed to a sale plan involving disposal of an investment, or a portion of an investment, in an associate or joint venture, the investment or the portion of the investment that will be disposed of is classified as held for sale when the criteria described above are met, and the Group discontinues the use of the equity method in relation to the portion that is classified as held for sale. Any retained portion of an investment in an associate or

a joint venture that has not been classified as held for sale continues to be accounted for using the equity method. The Group discontinues the use of the equity method at the time of disposal when the disposal results in the Group losing significant influence over the associate or joint venture.

After the disposal takes place, the Group accounts for any retained interest in the associate or joint venture in accordance with IAS 39 unless the retained interest continue to be an associate or a joint venture, in which case the Group uses the equity method.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell.

Revenue recognition

Revenue represents the net invoiced value of goods and services rendered and is recognized upon transfer of goods to a customer. Revenue is stated net of Value Added Tax (VAT) and discounts where applicable.

Revenue is measured based on the consideration to which the group expects to be entitled in a contract with a customer and excludes amounts collected on behalf of third parties.

Revenue is recognised as follows:

i. Sisal fibre export sales

The group recognizes revenue when it satisfies a performance obligation by transferring promised goods to a customer (which is when the customer obtains control of the goods). The amount of revenue recognized is the amount allocated to the satisfied performance obligation which is when sisal fibre is dispatched on freight on board (FOB) terms i.e. a point in time when sisal fibre is placed on the vessel.

ii. Local sales

For the sale of agricultural produce to the local market, revenue is recognised when control of the agricultural produce has transferred, being at the point the agricultural produce is delivered to the customer. Payment is due at the point the customer takes control of the agricultural produce.

2. Accounting policies (continued)

Revenue recognition (continued)

iii. Clearing and Forwarding Services

The group recognises revenue when it satisfies a performance obligation by clearing promised goods at the port (clearing and forwarding). The amount of revenue recognised is the amount allocated to the satisfied performance obligation. A performance obligation is satisfied at a point in time, when the customer obtains control of the service.

iv. Interest income is recognised on a time proportion basis using the effective interest method (EIR). EIR is the rate that exactly discounts the estimated future cash payments or receipts over the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or liability.

v. Produce grown on contract

Certain horticultural crops are grown on a contract basis. Revenue is recognised upon the harvesting of such crops.

The cost of production for cultivation of sisal, horticultural produce and manufacture of sisal yarns and twines is the accumulated total of all costs used to create the products which have been sold. The various costs of production fall into the general subcategories of leaf cutting costs, field costs, factory costs, engineering costs, direct labour, direct fibre purchases, factory overheads and depreciation. The cost of production does not include selling and distribution expenses.

The cost of sales for sisal export is the accumulated total of all costs incurred to bring the product to Free on Board (FOB) shipping condition as appropriate. The various costs of sales fall into the general subcategories of handling and all other shipping related costs.

Inventories

Inventories of agricultural produce are stated at fair value which is defined as the estimate of the selling price in the ordinary course of business, less applicable estimated selling costs at the point of harvest.

Inventories of processed twine and yarn are valued at the lower of factory production cost and net realisable value. Cost comprises direct factory labour, other direct costs and related production overheads but excludes interest expenses. Provision is made for slow moving and obsolete inventories.

Consumable stores and unbrushed sisal fibre are stated at the lower of cost and net realisable value. Cost is determined on the weighted average cost basis for consumable stores and production cost for unbrushed fibre. Provision is made for slow moving and obsolete inventories.

Net realisable value for processed twine, yarn and consumable stores represents the estimated selling price for inventories less all estimated costs necessary to make the sale.

Property, plant and equipment

All property, plant and equipment, including sisal bearer plants, are originally recorded at cost.

After initial recognition, sisal bearer plants are measured at accumulated cost until maturity, which is estimated at 3 years from the planting date.

All property, plant and equipment, including sisal bearer plants after maturity, are subsequently stated at historical cost less accumulated depreciation and any accumulated impairment losses. Historical cost includes expenditure directly attributable to the acquisition of the assets.

All property, plant and equipment is initially recognised at cost and subsequently stated at historical cost less accumulated depreciation and any accumulated impairment losses. Cost includes expenditure directly attributable to the acquisition of the assets.

2. Accounting policies (continued)

Property, plant and equipment (continued)

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. Repairs and maintenance expenses are charged to profit or loss in the period in which they are incurred.

Depreciation is calculated on the straight line basis to write down the cost of each asset over its estimated useful life as follows:

Buildings	50 years
Plant and machinery	
(including vehicles and equipment)	5 – 10 years
Computer software	5 years
Bearer plants	8 years

Leasehold land is depreciated over the unexpired term of the lease on the straight-line basis.

Residual values and useful lives of all assets are reviewed and adjusted, if appropriate, at the end of each reporting period.

Assets in the course of construction for production or administrative purposes are carried at cost, less any recognised impairment loss. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

Gains and losses on disposal of property, plant and equipment are determined by reference to their carrying amount and are taken into account in determining operating profits and losses.

Investment property

Investment properties are properties held to earn rentals and/or for capital appreciation (including property under construction for such purposes). Investment properties are measured at cost, including transaction costs, less accumulated depreciation. Depreciation is calculated on a straight line basis to write off the cost of the property over the shorter of the lease period or estimated useful life. An investment property is derecognised upon disposal

or when the investment property is permanently withdrawn from use and no future economic benefits are expected from the disposal. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period in which the property is derecognised.

Investment in unquoted shares

Unquoted investments are stated at cost less provision for impairment.

Biological assets

Biological assets are measured on initial recognition and at the end of each reporting period at fair value less estimated selling costs. Gains and losses arising on the initial recognition of biological assets and from subsequent changes in fair value less estimated selling costs are recognised in profit or loss in the accounting period in which they arise. The fair value of unharvested agricultural produce at the end of each reporting period is measured at the assessed fibre content of the leaves expected to be obtained within the next harvesting cycle.

All costs of planting, upkeep and maintenance of biological assets are recognised in profit or loss in the accounting period in which they are incurred.

Impairment

At the end of each reporting period, the group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the group estimates the recoverable amount of the cash-generating unit to which the asset belongs.

2. Accounting policies (continued)

Impairment (continued)

If the recoverable amount of an asset (or cashgenerating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash-generating unit) is reduced to its recoverable amount. Impairment losses are recognised as an expense immediately, unless the relevant asset is land or buildings at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (cash-generating unit) is increased to the revised estimate of its recoverable amount, but only to the extent that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (cash-generating unit) in prior years. A reversal of an impairment loss is recognised as income immediately, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as an increase in a revaluation reserve.

Accounting for leases

The group and company assess whether a contract is or contains a lease, at inception of the contract. The group recognizes a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less) and leases of low value assets. For these leases, the group and company recognise the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If this rate cannot be readily determined, the group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- ••fixed lease payments (including in-substance fixed payments), less any lease incentives;
- •• variable lease payments that depend on an index or rate, initially measured using the index or rate at the commencement date;
- •• the amount expected to be payable by the lessee under residual value quarantees;
- •• the exercise price of purchase options, if the lessee is reasonably certain to exercise the options; and
- •• payments of penalties for terminating the lease, if the lease term reflects the exercise of an option to terminate the lease.

The lease liability is presented as a separate line in the statement of financial position.

The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made. The group remeasures the lease liability (and makes a corresponding adjustment to the related right-of-use asset) whenever:

- •• the lease term has changed or there is a change in the assessment of exercise of a purchase option, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate.
- •• the lease payments change due to changes in an index or rate or a change in expected payment under a guaranteed residual value, in which cases the lease liability is remeasured by discounting the revised lease payments using the initial discount rate (unless the lease payments change is due to a change in a floating interest rate, in which case a revised discount rate is used).
- •• a lease contract is modified and the lease modification is not accounted for as a separate lease, in which case the lease liability is remeasured by discounting the revised lease payments using a revised discount rate if appropriate.

2. Accounting policies (continued)

Accounting for leases (continued)

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement day and any initial direct costs. They are subsequently measured at cost less accumulated depreciation and impairment losses.

Whenever the group and company incurs an obligation for costs to dismantle and remove a leased asset, restore the site on which it is located or restore the underlying asset to the condition required by the terms and conditions of the lease, a provision is recognised and measured under IAS 37. The costs are included in the related right-of-use asset, unless those costs are incurred to produce inventories.

Right-of-use assets are depreciated over the shorter period of lease term and useful life of the underlying asset. If a lease transfers ownership of the underlying asset or the cost of the right-of-use asset reflects that the company expects to exercise a purchase option, the related right-of-use asset is depreciated over the useful life of the underlying asset. The depreciation starts at the commencement date of the lease. The right-of-use assets are presented as a separate line in the statement of financial position.

The group and company apply IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the 'Property, plant and equipment' policy.

Variable rents that do not depend on an index or rate are not included in the measurement of the lease liability and the right-of-use asset. The related payments are recognised as an expense in the period in which the event or condition that triggers those payments occurs and are included in the line 'Other expenses' in the statement of profit or loss.

Offsetting

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to set off the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Taxation

Income tax expense is the aggregate amount charged/credited in respect of current tax and deferred tax in determining the profit or loss for the year.

Current tax is provided on the basis of the results for the year as shown in the financial statements adjusted in accordance with tax legislation and calculated by using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is provided, using the liability method, for all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. Tax rates enacted or substantively enacted at the end of the reporting period and which are expected to apply in the period in which the liability is settled or the asset realised are used to determine deferred tax

Deferred tax assets are recognised only to the extent that it is probable that future taxable profits will be available against which the temporary differences can be utilised.

Current and deferred tax are recognised in profit or loss except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

Capital gains tax is provided, when there is a confirmed agreement to dispose of an item subject to capital gains tax, on the basis of the appropriate tax legislation regarding the computation of capital gains and the tax rates that have been enacted or substantively enacted at the end of the reporting period and which are expected to apply in the period in which the asset will be realised.

2. Accounting policies (continued)

Post-employment benefit obligations

The company participates in a group defined benefit retirement scheme for certain employees. The scheme's assets are held in a separate trusteeadministered fund which is funded by contributions from both the company and employees

The pension costs are assessed using the projected unit credit method. Remeasurement, comprising actuarial gains and losses, the effect of the changes to the asset ceiling (if applicable) and the return on plan assets (excluding interest), is reflected immediately in the statement of financial position with a charge or credit recognised in other comprehensive income in the period in which they occur. Remeasurement recognised in other comprehensive income is reflected immediately in retained earnings and will not be reclassified to profit or loss. Past service cost is recognised in profit or loss in the period of a plan amendment. Net interest is calculated by applying the discount rate at the beginning of the period to the net defined benefit liability or asset. Defined benefit costs are categorised as service costs (including current service cost, past service cost, as well as gains and losses on curtailments and settlements), net interest expense or income and remeasurement.

The group presents the first two components of defined benefit costs in profit or loss in the line item of pension cost-defined benefit scheme (included in staff costs). Curtailment gains and losses are accounted for as past service costs.

The retirement benefit obligation recognised in the statement of financial position represents the actual deficit or surplus in the company's defined benefit plans. Any surplus resulting from this calculation and after recognition of any benefit arising from reduced employer contributions which may be available to the group as a result of the scheme being in an actuarial surplus position is limited to 50% of the total surplus in conformity with the regulations of the Retirement Benefits Authority.

A liability for a termination benefit is recognised at the earlier of when the entity can no longer withdraw the offer of the termination benefit and when the entity recognises any related restructuring costs. The group has also established a defined contribution retirement benefit scheme for eligible non-unionisable employees. The scheme's assets are held in a separate trustee-administered fund which is funded by contributions from both the company and employees. The group has no obligation, legal or constructive to make further contributions if the scheme does not have sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

In addition, the group makes contributions to the National Social Security Fund in the countries of operation, which are statutory defined contribution schemes. The group's obligations under these schemes is limited to specific contributions as legislated from time to time.

The group's contributions in respect of all defined contributions schemes are charged to profit or loss in the year to which they relate.

Employee entitlements

Employee entitlements to retirement gratuities are recognised when they accrue to employees. A provision is made for the estimated liability for retirement gratuities as a result of services rendered by employees up to the end of the reporting period.

The estimated monetary liability for employees' accrued annual leave entitlement at the end of the reporting period date is recognised as an expense accrual.

Investment in subsidiaries

Investments in subsidiary companies are shown at cost less provision for impairment losses. Where, in the opinion of the Directors, there has been an impairment of the value of an investment, the loss is recognised as an expense in the period in which the impairment is identified.

Long-term loans to subsidiaries, settlement of which has not been planned for the foreseeable future, are regarded as part of the net investment in the subsidiaries. In accordance with IAS 21 – The Effects of Changes in Foreign Exchange Rates, the exchange differences arising on such loans are dealt with in the statement of changes in equity.

2. Accounting policies (continued)

Investment in subsidiaries (continued)

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount and cumulative related exchange differences dealt with in the translation reserve are charged or credited to profit or loss.

Financial instruments

Financial assets and financial liabilities are recognised in the group's statement of financial position when the group becomes a party to the contractual provisions of the instruments constituting such assets and liabilities.

Trade receivables

Trade receivables are stated at their nominal value and reduced by appropriate allowances for estimated irrecoverable amounts. Objective evidence of impairment of the receivables is when there is significant financial difficulty of the counterparty or when there is a default or delinquency in payment according to agreed terms. When a trade receivable is considered uncollectible, it is written off against the allowance account.

Impairment of financial assets

The group measures loss allowance equal to lifetime expected credit losses for trade and other receivables and amounts due from related companies held at amortised cost as these receivables do not contain a significant financing component, since such receivables are normally due for settlement within 30 days from invoice date.

Cash flows relating to short-term receivables (0-12 months) generally are not discounted, unless the effect of doing so would be material. The carrying amount of the asset should be reduced to its estimated recoverable amount through use of an allowance account. The amount of the loss should be included in net profit and loss for the period.

As trade receivables are generally due within 30 days from invoice date, existing provision matrices/methodologies incorporating both historical and forward looking information may be used to

determine the lifetime expected credit losses and therefore measuring the provision for doubtful debts for trade receivables is not expected to change under IFRS 9.

(i) Significant increase in credit risk

At each reporting date, the group measures the loss allowance for a trade measured at amortized cost at an amount equal to the lifetime expected credit losses if the credit risk on that financial instrument has increased significantly since initial recognition.

This assessment is made considering all reasonable and supportable information, including that which is forward looking. Indicators of significant increase in credit risk could include (but not limited to) any of the following:

- significant financial difficulty
- an actual breach of contract, such as a default in interest or principal payments
- a high probability of bankruptcy or other financial reorganization
- the disappearance of an active market due to financial difficulties.

If there is no significant increase in expected losses, then a loss allowance for 12 months must be recognised.

(ii) Definition of default

The group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that financial assets that meet either of the following criteria are generally not recoverable:

- when there is a breach of financial covenants by the debtor; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the company, in full (without taking into account any collateral held by the company).

2. Accounting policies (continued)

Impairment of financial assets (continued)

Irrespective of the above analysis, the group considers that default has occurred when a financial asset is more than 30 days past due unless the group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

The group writes-off debt only when there is objective evidence that the debt will not be recovered and after it has exhausted its collection avenues.

(iii) Measurement and recognition of expected credit losses

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information as described above.

As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the group in accordance with the contract and all the cash flows that the group expects to receive, discounted at the original effective interest rate.

The group recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

Cash and cash equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks and other short term deposits with original maturities of three months or less.

Borrowings

Borrowings are initially recorded at fair value, net of any transaction costs incurred, and are subsequently stated at amortised cost using the effective interest rate method. Any difference between the net proceeds and the redemption value is recognised in profit or loss over the period of the borrowings.

Borrowings are classified as current liabilities unless there is an unconditional right to defer settlement of the liability for at least 12 months from the end of the reporting period.

Trade payables

Trade payables are stated at their nominal value

Fair value measurement

The group does not have any financial assets or financial liabilities subject to fair value estimation.

Biological assets are stated at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to or by the company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non –financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

2. Accounting policies (continued)

Fair value measurement (continued)

The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole.

- Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2 Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3 Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

Borrowings costs

Borrowing costs that are directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

All other borrowings costs are recognised in the profit or loss in the period in which they are incurred.

Share Capital

Ordinary shares are classified as share capital in equity. Any amounts received in excess of the par value of the shares issued are classified as share premium in equity.

Provisions

Provisions are recognised when the group has a present obligation (legal or constructive) as a result of a past event and it is probable that the group will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Dividends

Dividends payable on ordinary shares are charged to equity in the period in which they are declared. Proposed dividends are accrued for after ratification at an annual general meeting.

Comparatives

Where necessary, comparative figures have been restated to conform with current year presentation.

3. Critical accounting judgements and key sources of estimation uncertainty

In the process of applying the group's accounting policies, management is required to make judgements, estimates and assumptions that affect the carrying amounts of assets and liabilities. The estimates and judgements are based on historical experience and other factors, including expectations of future events that are believed to be reasonable and relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The key areas of judgement in applying the group's accounting policies and sources of estimation uncertainty are dealt with below:

(a) Critical judgements in applying accounting principles

There are no critical judgements, apart from those involving estimation (see b below), that the directors have made in the process of applying the group's

3. Critical accounting judgements and key sources of estimation uncertainty (continued)

(a) Critical judgements in applying accounting principles (continued)

accounting policies and that have a significant effect on the amounts recognised in the financial statements.

(b) Key sources of estimation uncertainty

Impairment losses

The carrying amounts of tangible and intangible assets are reviewed at the end of each reporting period to determine whether there is any indication that assets may have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss.

No impairment losses were identified at the end of the reporting period.

Property, plant, equipment and intangible assets

Critical estimates are made by the directors in determining depreciation rates for property, plant, equipment, bearer plants and intangible assets and whether assets are impaired.

No changes to the useful lives were identified at the end of the reporting period.

Biological assets

(a) Horticultural crops

In determining the fair value of horticultural crops, the group uses the present value of expected cash flows from the asset discounted at a current market determined pre tax rate. The objective of a calculation of the present value of expected net cash flows is to determine the fair value of a biological asset in its present location and condition. The group considers this in determining an appropriate discount rate to be used and in estimating net cash flows. Management uses estimates based on historical data relating to yields and market prices. The methodology and assumptions used for estimating both the amount and timing of future cash flows are reviewed to

reduce any differences between estimates and actual experience.

(b) Agricultural produce at the point of harvest

Critical estimates are made by the directors in determining the fibre content of sisal leaves to be obtained within the next harvesting cycle as well as estimating the fair value of the fibre.

Further details of the significant assumptions relating to the measurement and valuation of biological assets are set out in note 13.

Defined benefit retirement scheme

Critical assumptions are made by the actuary in determining the present value of the defined benefit retirement scheme obligations. The carrying amount of the post employment benefit asset and the key assumptions made in estimating the post employment benefit asset are set out in Note 24 (b).

The group has certain legal commitments relating to the defined benefit retirement scheme. The following factors could all serve to increase or decrease the retirement benefit scheme asset.

Future investment returns on scheme assets that are either above or below expectations.

Changes in actuarial assumptions including mortality of participating members.

Higher or lower rates of inflation and/or rising or falling bond returns rates used to discount the defined benefit obligation.

Changes in future funding contributions to the retirement benefit scheme may affect future net assets and results of operations of the participating companies.

Deferred tax asset

At the end of each reporting period the directors make a judgement in determining whether it is appropriate to recognise any deferred tax asset.

3. Critical accounting judgements and key sources of estimation uncertainty (continued)

Income taxes

The group is subject to income taxes in various jurisdictions. Significant judgement is required in determining the group's liability to income tax. Certain transactions may arise for which the ultimate tax determination is uncertain during the ordinary course of business. The group recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Lease liability

In order to make a judgement to determine the term of the lease and the corresponding lease liability, the directors consider any options regarding extension or termination of the lease contract which may be available and whether it is probable that such options will be exercised.

Unless there is an implicit interest rate contained in the lease contract, the discount rate used to calculate the net present value of the lease liability is the group's incremental borrowing rate. This rate is estimated by the directors to be the rate which would be paid by the group to purchase a similar asset.

4. Financial risk management

The group's and company's activities expose it to a variety of financial risks, including credit risk and the effects of changes in debt and market prices, foreign currency exchange rates and interest rates. The group's and company's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on its financial performance within the options available in East Africa to hedge against such risks.

The group's and company's risk management policies are approved by the board of directors who also give guidance to management on the operation of these policies.

4. Financial risk management (continued)

=				

Market risk

The activities of the group and company expose it primarily to the financial risk of changes in foreign currency exchange rates and interest rates. There has been no change during the year to the group's and company's exposure to market risks or the manner in which it manages and measures the risk.

Foreign exchange risk

Sales of sisal fibre, yarn and twine are undertaken primarily in United States Dollars on agreed terms. Foreign exchange risk arises from future commercial transactions, recognised assets and liabilities and net investments in foreign operations. Operating expenses of the group are primarily payable in local currencies. Foreign currency receipts are converted into local currencies on an ongoing basis. The group and company do not normally enter into forward foreign exchange contracts for the conversion of foreign currency into local currency.

At the end of the year, the carrying amounts of foreign currency denominated assets and monetary liabilities were as follows:

4. Financial risk management (continued)

Foreign exchange risk (continued)

	Assets		Liabilities

4. Financial risk management (continued)

Foreign currency sensitivity analysis

The principal foreign currency exposure relates to the fluctuation of the functional currencies of the group and company against foreign currencies, primarily the United States Dollar.

The following table details the group's and company's sensitivity to a 5% increase or decrease of the Kenya Shilling against the relevant foreign currencies. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the year end for a 5% change in foreign currency rates. The sensitivity analysis includes external loans.

Sterling Pound	294(ii)	325(ii)	-	-

- (i) Indicates the increase in profit before tax of a weakening of the Kenya Shilling against the US Dollar by 5%. A strengthening of the Kenya Shilling against these currencies by 5% would result in a reduction in profit of the same amount
- (ii) Indicates the reduction in profit before tax of a weakening of the Kenya Shilling against the Sterling Pound and Euro by 5%. A strengthening of the Kenya Shilling against the Sterling Pound and Euro by 5% would result in an increase of the same amount

The sensitivity analysis relates to outstanding foreign currency denominated monetary items at the year end only and is unrepresentative of the inherent foreign exchange risk as the year end exposure does not reflect the exposure during the year.

Price risk

The group and company do not hold any financial instruments subject to price risk.

Interest rate risk

The group and company are exposed to interest rate risk as it has borrowings at variable interest rates.

Interest rate sensitivity

The sensitivity analysis has been prepared on the assumption that the outstanding balance of borrowings at variable interest rates at the end of the reporting period remained constant for the whole year.

If interest rates had been 1% higher/lower and all other variables remained constant, the group's and company's profit before tax for the year ended 30 September 2022 would have been decreased/increased as below:

Company	Cor	up	Gro
2022 202	2022	2021	2022
Shs'000 Shs'00	Shs'000	Shs'000	Shs'000
137 12	137	2,717	2,837

4. Financial risk management (continued)

Credit risk

Credit risk is the risk of financial loss in the event that a customer or counter-party to a financial instrument fails to meet its contractual obligations. The Group and Company have adopted a policy of only dealing with creditworthy counterparties and obtaining collateral where appropriate.

The group's and company's current credit risk grading framework comprises the following categories;

Category	Description	Basis for recognizing expected credit losses
Performing	The counterparty has a low risk of default and does not have any past-due amounts	12 month ECL
Doubtful	Amount is > 75 days due or there has been a significant increase in credit risk since initial recognition	Lifetime ECL – not credit – impaired
In default	Amount is > 120 days past due or there is evidence indicating the asset is creditimpaired.	Lifetime ECL – credit impaired.
Write-off	There is evidence indicating that the debtor is in severe financial difficulty and the company has no realistic prospect of recovery.	Amount is written off.

The tables below detail the credit quality of the Group's and Company's financial assets as well as the Group's and Company's maximum exposure to credit risk by credit risk rating grade.

Group 2022	Internal/ external rating	12 months or lifetime ECL	Gross carrying amount Shs'000	Loss allowance Shs'000	Net amount Shs'000
Trade receivables	Performing	Lifetime ECL (simplified approach)	4,693	-	4,693
Due from related companies	Performing	Lifetime ECL (simplified approach)	305,357	-	305,357
Other receivables	Performing	Lifetime ECL (simplified approach)	564,140	-	564,140
Bank balances	Investment grade	12 months ECL	181,448	-	181,448
		=	1,055,638		1,055,638

4. Financial risk management (continued)

Credit risk (continued)

Company 2021	Internal/external rating	12 months or lifetime ECL	Gross carrying amount Shs'000	Loss allowance Shs'000	Net amount Shs'000
Trade receivables	Performing	Lifetime ECL (simplified approach)	13	-	13
Due from related companies	Performing	Lifetime ECL (simplified approach)	589,179	-	589,179
Other receivables	Performing	Lifetime ECL (simplified approach)	33,835	-	33,835
Bank balances	Investment grade	12 months ELC	334,242	-	334,242
			957,269	-	957,269

For trade and other receivables and amounts due from related companies, the Group and Company have applied the simplified approach in IFRS 9 to measure the loss allowance at lifetime ECL (which in the case of the Group and Company is the same as the 12-month ECL). The loss allowance is determined individually on specific customer balances.

The simplified approach is used for trade and other receivables and amounts due from related companies given that they are without a financing component. Because the simplified approach is used, an assessment as to whether there has been a significant increase in credit risk for those assets has not been performed.

The Cash and Cash equivalents are carried at gross amount – amortized cost. The loss allowance on cash and cash equivalents, if recognized, would pass through the Profit and Loss account. The current liquid assets have been recognized as the principal amount receivable from the Banks excluding any interest. Bank balances are not restricted and include deposits held with banks that have high credit ratings. Bank balances are thus considered investment grade.

4. Financial risk management (continued)

Liquidity risk

Liquidity risk is the risk that the Group and Company will not be able to meet its financial obligations as they fall due. The Group and Company manage liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows and matching the maturity profiles of financial assets and liabilities.

The table below analyses the financial liabilities that will be settled on a net basis into the relevant maturity groupings based on the remaining period at the end of the reporting period to the contractual maturity date. The amounts disclosed in the table below are the contractual undiscounted cash flows of financial liabilities and includes both interest and principal cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

4. Financial risk management (continued)

Capital risk management

The group manages its capital to ensure that it will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance.

A key element of capital management is to ensure that adequate funds are available for capital development.

There were no changes in the group's approach to capital management during the year.

The capital structure of the group consists of borrowings, lease liabilities, bank balances and cash and equity attributable to equity holders of the parent company; comprising issued capital, share premium, translation deficit and retained earnings.

The group and company did not have any net borrowings at the end of the previous year.

9. Tax (continued)

The tax on the group and company's profit before tax differs from the theoretical amount that would arise using the basic tax rate as follows:

	Grou	р	Company		
	2022	2021	2022	2021	
	Shs'000	Shs'000	Shs'000	Shs'000	
Profit before tax	768,057	560,372	249,960	146,185	
Tax calculated at respective current tax rates	230,417	162,989	74,988	42,028	
Tax effect of:					
Income not subject to tax	(65)	980	(13,853)	(24,509)	
Expenses not deductible for tax purposes	26,635	26,769	7,311	6,101	
(Over)/under provision of deferred tax in prior year	-	(245)	-	55	
Over provision of current tax in prior years	-	(476)	-	(539)	
Effect of change in tax rate	-	476	-	(59)	
Prior year tax assessment	-	1,631	-	-	
Tax charge	256,987	192,124	68,446	23,077	
(b) Tax credit recognised in other comprehensive income/(loss)					
Deferred tax credit attributable to remeasurement of net defined benefit asset	(7,084)	(651)	(4,222)	(1,121)	

The current tax rate for the Kenyan companies was 30% (2021:28.75%) while that for Tanzanian companies was 30% (2021:30%).

At 30 September 2022, the group had tax losses amounting to Shs 13,122,000 and Shs 10,600,000 in respect of the subsidiary companies DWA Estate Limited (Biomass energy project) and Amboni Spinning Mill Limited (general trading business) respectively (2021: Shs 17,168,000 and Shs 416,000) available to carry forward and set -off against future taxable income.

9. Tax (continued)

(c) Tax movement

	Group		Compa		
	2022	2021	2022	2021	
	Shs'000	Shs'000	Shs'000	Shs'000

	11,619	(13,086)	19,821	(12,627)	

10. Earnings per share

Basic earnings per share is calculated by dividing the profit for the year from continuing and discontinued operations attributable to ordinary shareholders by the weighted average number of ordinary shares in issue during the year.

	Gro	oup
	2022	2021
	Shs'000	Shs'000
Profit for the year (Shs '000)	511,070	368,248
Average number of ordinary shares (thousands)	60,000	60,000
Basic and diluted earnings per share (Shs)	8.52	6.14

There were no potentially dilutive ordinary shares outstanding at 30 September 2022 and at 30 September 2021. Diluted earnings per share are therefore the same as basic earnings per share.

11. Dividends

Interim dividends amounting to Shs 4 per share were declared and paid in respect of the year ended 30 September 2022 (2021: Shs 15).

12. Property, plant and equipment

12. Property, plant and equipment (continued)

(a) Group

Included in property, plant and equipment are assets with an original cost of Shs 830,288,000 (2021: Shs 696,257,000) which are fully depreciated and whose normal depreciation charge for the year would have been Shs 136,406,000 (2021: Shs 115,537,000).

The capital work in progress relates to a Biomass Power Project and various construction projects being undertaken by the group.

Interest expense directly attributable to the acquisition and construction of qualifying assets capitalised during the year amounted to Shs 5,253,000 (2021: Shs 10,101,000)

During the year, management carried out a review of the working condition of the group's plant and machinery. This review led to the write-off of assets whose total cost was Shs 2,293,000 (2021: Shs 38,714,000) and had a carrying value of Shs nil (2021: Shs nil). Bearer plants with a total cost of Shs 162,941,000 (2021: Shs 138,159,000) and a carrying value of Shs nil (2021: Shs nil) were cut out, having reached the end of their productive life.

Based on an impairment review performed by the directors at 30 September 2022, no further indications of impairment of property, plant and equipment were identified. (2021: none).

The group's land titles in Kenya, which were originally either freehold or leases in excess of 900 years, were converted to 99 year leases with effect from 27th August 2010. The group has yet to receive the new title deeds.

The remaining periods for the land titles in Tanzania range from 9 years to 41 years.

Included in property, plant and equipment are assets with an original cost of Shs 112,708,000 (2021:Shs 112,318,000) which are fully depreciated and whose normal depreciation charge for the year would have been Shs 21,366,000 (2021:Shs 21,302,000)

During the year management carried out a review of the working condition of the company's plant and machinery. This review led to the write-off of assets whose total cost was Shs 578,000 (2021: Shs 19,634,000) and had a carrying value of Shs nil (2021: Shs nil). Bearer plants with a total cost of Shs 35,635,000 (2021: Shs 40,167,000) were also cut out having reached the end of their productive life.

Based on an impairment review performed by the directors as at 30 September 2022, no indications of further impairment of property, plant and equipment were identified. (2021: none).

The company's land titles consist of beach plots in a residential development managed by an unrelated company, Vipingo Beach Limited (Note 14).

13. Biological assets

13. Biological assets (continued)

(b) Company

Sisal agricultural produce	2022 Shs'000	2021 Shs'000
Carrying amount at start of year	133,301	127,484
Loss arising from changes in fair value attributable to physical changes	(13,898)	(7,016)
Gain arising from changes in fair value attributable to price changes	46,941	12,833
Net fair value gain	33,043	5,817
Carrying amount at end of year	166,344	133,301

Biological assets comprises of growing produce for both sisal and horticultural crops and is stated at fair value in accordance with the principles of IAS 41.

Growing produce in relation to sisal is represented by the fair value of the estimated fibre content, at the accounting date, of the leaves which may be expected to be cut during the next harvesting cycle less anticipated harvesting, fibre extraction and point of sale costs.

Significant assumptions made in determining the fair value of the sisal agricultural produce are:

- Sisal plants are cut, on average at six monthly intervals throughout the plants' productive life.
- Leaves grow at a uniform rate between cuts.
- Fibre weight increases at a uniform rate between cuts.
- The average monthly production will be one twelfth of the budgeted annual production for the forthcoming year.
- The harvesting, processing and selling costs and the average unit selling price are based upon the budget for the forthcoming year following the accounting date.

Horticultural crops at the year end comprised of baby corn, maize and water melon.

The approximate periods to commencement of harvest for the various crops are:

	Weeks
Baby corn	12
Maize	12
Water melons	13
Water melons	13

Significant assumptions made in determining the fair value of horticultural biological assets are:

- Baby corn and maize anticipated future cash flows based on current market prices and budgeted costs of production as approved by the directors.
- Water melons the anticipated future cash flows based on current market prices, budgeted costs of production and costs to sale.

14. Investment properties

The group holds 7 plots in a residential development managed by an unrelated company, Vipingo Beach Limited. Two plots are utilised by the company and are included in property, plant and equipment. The information given below relates to the remaining 5 plots which are held as investment property. The properties are held under leasehold interests. The directors consider that the titles to leasehold land held by the group and company constitute finance leases.

Investment properties

	Group and Company		
	2022 Shs'000	2021 Shs'000

The right of use asset relates to agricultural land held under licence to occupy and warehousing and office facilities held under lease.

IFRS 16 requires that right of use assets be tested for impairment in accordance with IAS 36. An impairment review performed by the directors at 30 September 2022 did not identify any impairment in the carrying value of the right of use asset (2021: None).

16. Fair value hierarchy

The table below shows an analysis of all assets and liabilities measured at fair value in the financial statements or for which fair values are disclosed in the financial statements by level of the fair value hierarchy. These are grouped into levels 1 to 3 based on the degree to which the fair value is observable.

- Level 1 fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as a price) or indirectly (derived from prices); and
- Level 3 fair value measurements are those derived from valuation techniques that include
 inputs for the asset or liability that are not based on observable market data (unobservable
 inputs). The principal unobservable inputs for biological assets are yield, market prices
 and the exchange rate between the Kenya Shilling and US Dollar. Any variation from the
 assumptions used in the fair value measurement would result in a corresponding variation
 in the valuation of the biological asset.

Group

	Level 1 Shs'000	Level 2 Shs'000	Level 3 Shs'000
30 September 2022 Biological assets Investment properties	-	72,344 47,500	878,982 -
30 September 2021			
Biological assets Investment properties	-	57,002 47,500	694,920
Company			
	Level 1 Shs'000	Level 2 Shs'000	Level 3 Shs'000
30 September 2022 Biological assets Investment properties	-	- 47,500	166,344 -
30 September 2021 Biological assets Investment properties	-	- 47,500	133,301 -

16. Fair value hierarchy (continued)

Fair value of biological assets is assessed as follows:

The fair value of the sisal agricultural produce is estimated as the value of the assessed fibre content of the leaves which may be expected to be cut during the next harvesting cycle, less anticipated harvesting, fibre extraction and point of sale costs.

Horticultural crops:

Baby corn and maize—anticipated future cash flows based on current market prices and budgeted costs of production as approved by the directors.

Watermelons – the anticipated future cash flows based on current market prices, budgeted costs of production and costs to sale.

Sensitivity analysis of Level 3 Biological assets

Group

An increase/(reduction) in the production per hectare of 5% would result in an increase/(decrease) in the fair value of agricultural produce at the point of harvest of Shs 43,945,000 (2021: Shs 34,746,000).

An increase/(decrease) in the selling price per tonne of 5% would result in an increase/(decrease) in the fair value of agricultural produce at the point of harvest of Shs 55,265,000 (2021: Shs 45,213,000).

Sisal fibre is traded in foreign currency, specifically the US Dollar. An (decrease)/increase of the Kenya Shilling/Tanzania Shilling against the US Dollar would therefore result in the same increase/(decrease) in the fair value of agricultural produce at the point of harvest as a similar variation of the selling price.

Company

17.

An increase/(reduction) in the production per hectare of 5% would result in an increase/(decrease) in the fair value of agricultural produce at the point of harvest of Shs 8,317,000 (2021: Shs 6,665,000).

An increase/(decrease) in the selling price per tonne of 5% would result in an increase/(decrease) in the fair value of agricultural produce at the point of harvest of Shs 11,110,000 (2021: Shs 9,590,000)

Sisal fibre is traded in foreign currency, specifically the US Dollar. A decrease/(increase) of the Kenya Shilling against the US Dollar would therefore result in the same increase/(decrease) in the fair value of agricultural produce at the point of harvest as a similar variation of the selling price.

The fair values of investment properties at 30 September 2022 are based on valuations made by Lloyd Masika Limited, Registered Valuers at the end of the year.

Investment in subsidiaries	Company		
	2022	2021	
	Shs'000	Shs'000	
Shares in subsidiaries at cost	134,175	134,175	
Long term receivable from subsidiary	64,768	59,843	
	198,943	194,018	

17 Investment in subsidiaries *(continued)*

The subsidiary companies, which are all wholly owned and unquoted, are:

Company	Share capital Shs'000	Country of incorporation	Principal activity
Amboni Plantations Limited	Tshs 250,000	Tanzania	Cultivation of sisal and sale of sisal fibre
Amboni Spinning Mill Limited	Tshs 250,000	Tanzania	Manufacture and sale of sisal twine and yarn
Dwa Estate Limited	Kshs 2,000	Kenya	Cultivation of sisal and sale of sisal fibre
Wigglesworth Exporters Limited	Kshs 1,000	Kenya	Export of sisal fibre

The long term receivable is in respect of a loan due from Amboni Spinning Mill Limited. As settlement of this loan is not anticipated in the near future, it has been accounted for as an addition to the investment in the subsidiary company in accordance with the provision of IAS 21.

18. Investment in unquoted shares – at cost

	Group and Company		
	2022		
	Shs'000	Shs'000	
700 shares in Vipingo Beach Limited	10,028	10,028	

The group and company hold 7 plots in a residential development, Vipingo Beach Limited. It is a requirement that owners of such plots should be holders of 100 shares in Vipingo Beach Limited for each plot held (Note 14).

19. Inventories

19.	Inventories				
		Grou	-	Compa	-
		2022	2021	2022	2021
		Shs'000	Shs'000	Shs'000	Shs'000
	Sisal fibre at fair value less estimated cost of sale	528,754	340,716	162,738	109,586
	Horticultural produce at fair value less estimated cost of sale	61	168	-	-
	Finished goods at lower of cost or net realisable value less provision	60,142	49,955	-	-
	Stores and raw materials at lower of cost or net realisable value less provision	366,899	286,154	54,016	47,661
		955,856	676,993	216,754	157,247
20.	Receivables and prepayments				
	Trade receivables	4,693	31,692	227	13
	Prepayments	44,604	39,309	5,801	5,096
	Amount due from related parties (Note 31 (v))	305,357	321,839	63,837	109,657
	Amounts due from group companies (Note 31 (v))	-	-	520,764	479,522
	VAT recoverable	538,309	404,899	17,831	33,067
	Other receivables	25,831	28,487	522	768
		918,794	826,226	608,982	628,123

The receivable amounts are short-term and hence the impact of discounting would be insignificant, thus the carrying amounts approximate to the fair value.

21. Cash and cash equivalents

•	Gro	ир	Company	
	2022 Shs'000	2021 Shs'000	2022 Shs'000	2021 Shs'000
Cash in hand	13,636	12,990	1,704	744
Cash at bank				
Current accounts	50,853	51,860	38,037	15,057
Deposits				
Call deposit USD	49,849	-	49,849	-
Term deposit - USD	80,746	319,185	80,746	319,185
Term deposit - Tsh	-	37,064	-	-
Total cash at bank	181,448	408,109	168,632	334,242
Total cash and cash equivalents	195,084	421,099	170,336	334,986

The effective average interest rate on the USD bank deposits at the year end was 3% for term deposits and 1.5% for call deposits.

The effective average interest rate of the Tsh deposits at the end of the previous year was 8.5%.

All term deposits mature within a period not exceeding 90 days or are accessible on demand.

For the purposes of the cash flow statements the year end cash and cash equivalents comprise the following:

	Group		Company	
	2022 Shs'000	2021 Shs'000	2022 Shs'000	2021 Shs'000
Cash at bank and in hand as above Bank overdrafts (Note 25)	195,084 (156,132)	421,099 (73,543)	170,336	334,986
	38,952	347,556	170,336	334,986

22. Share capital

Authorised, issued and fully paid	Number	Share	Share
	of shares	Capital	Premium
	(Thousands)	Shs'000	Shs'000
Balance at 1 October 2020, 1 October 2021 and 30 September 2022	60,000	300,000	84,496

The total authorised number of ordinary shares is 60 million with a par value of Shs 5 per share. All issued shares are fully paid.

23. Deferred tax

Deferred tax is calculated, in full, on all temporary differences under the liability method using a principal tax rate of 30% (2021: 30%). The movement on the deferred tax account is as follows:

	Group		Company	
	2022	2021	2022	2021
	Shs'000	Shs'000	Shs'000	Shs'000
At start of year Tax charge/(credit) recognised in profit or loss (Note 9 (a))	607,152	588,290	93,852	96,329
	59,630	13,257	8,016	(1,356)
Tax credit recognised in other comprehensive income/(loss) (Note 9(b))	(7,084)	(651)	(4,222)	(1,121)
Translation adjustment	24,393	6,256	-	-
At end of year	684,091	607,152	97,646	93,852

The following amounts, determined after appropriate offsetting, are shown in the consolidated and separate statements of financial position.

	Group		Comp	oany
	2022 2021		2022	2021
	Shs'000	Shs'000	Shs'000	Shs'000

At end of year	334,480	312,668	128,086	124,380

24. Post employment benefit obligations/ (asset) (continued)

(b) Defined benefit retirement scheme

The group operates a final salary defined benefit pension scheme for certain employees. The assets of the scheme are held in a separate trustee administered fund. The pension cost to the group is assessed in accordance with the advice of qualified actuaries who carry out a full valuation of the scheme every three years. The next full valuation is due on 1 January 2024.

The amount recognised in the statement of financial position is determined as follows:

	Group		Company	
	2022 2021		2022	2021
	Shs'000	Shs'000	Shs'000	Shs'000

	=====	

24. Post employment benefit obligation/(asset) (continued)

(b) Defined benefit retirement scheme (continued)

Movements in the company post employment benefit asset in the current year:

	Company	
	2022 Shs'000	2021 Shs'000
Opening defined benefit asset	(49,293)	(45,312)
Amounts recognised in profit or loss:		
Current service cost net of employees' contributions	1,084	980
Interest on obligation	24,035	24,740
Interest on effect of asset ceiling	6,683	1,294
Interest income on plan assets	(37,252)	(31,674)
Net credit for the year included in staff costs	(5,450)	(4,660)
Employer's contributions	(3,094)	(3,058)
Amount recognised in other comprehensive income/(loss)	14,073	3,737
Defined benefit asset at the end of the reporting period	(43,764)	(49,293)

The above amounts are determined by apportioning the totals for the group scheme on the basis of aggregate contributions paid.

Post employment benefit obligation/(asset) (continued) 24.

(b) Defined benefit retirement scheme (continued)

The following assumptions represent management's best estimate of long-term expectation.

	2022	2021
- discount rate	14.0%	13.3%
- future salary increases	9.0%	8.0%
- future pension increases	0%	0%

Other disclosures

Characteristics and Risks of the Scheme:

The Scheme is of a defined benefit nature (i.e. salary and service related). Therefore one of the main risks relating to the benefits under the Scheme is the rate of salary growth. As the benefits are based on the final salary, any changes in salary that differ from the salary escalation rate assumed will have a direct bearing on the benefits paid and the present value of the benefit obligation under the scheme. The Company's experience with respect to pre-retirement exit experience, actual ages of retirement and mortality will also impact the benefits payable under the Scheme, when compared with the assumption made. The Scheme is registered under irrevocable trust with the Retirement Benefits Authority. The Retirement Benefits Act, 1997 and Regulations under the Act require the Scheme to maintain a funding level of 100%. Where the funding level is below, such deficits are required to be amortised over a period not exceeding 6 years.

Asset ceiling

The Regulations require that, in the event of a winding up of the Scheme, any surplus, after recognition of the benefit arising from reduced employer contributions available to the group as a result of the scheme being in an actuarial surplus position, is to be shared on an equal basis between the members of the scheme and the sponsor. The potential effect of this is reflected in the asset position at the end of the financial period.

Sensitivity of the Results:

The results of the actuarial valuation will be more sensitive to changes in the financial assumption than changes in the demographic assumptions. In preparing the sensitivity analysis of the results to the discount rate used, the actuaries have relied on the calculations of the duration of the liability. Based on this methodology, the results of the sensitivity analysis are summarised in the table below:

Present value of obligation

2022	Ksh'000 Current Discount Rate	Ksh'000 Discount Rate – 1%
	(%) 14%	(%) 13%
	363,200	361,600
2021	Ksh'000	Ksh'000
	(13.3%) 317,000	(12.3%) 316,500

24. Post employment benefit obligation/(asset) (continued)

(b) Defined benefit retirement scheme (continued)

Since the bulk of the benefits payable under the Scheme are salary related, the sensitivity of the liability to a change in the salary escalation assumption is not expected to be materially different. However, the impact of a change in salary escalation is expected to be less than the impact of a change in the discount rate as a portion of the liabilities (for example the liability in respect of pensions in payment and deferred pensioners) would not be affected by a change in the salary escalation rate.

Effect on Company Cashflows:

The Scheme is funded and therefore benefits are paid from Scheme assets as and when they arise. The Company is required to contribute to the Scheme in respect of the accrual of new benefits and towards any deficit that may arise. As the Scheme is closed, the cost of accrual of new benefits may rise over time with the ageing of the active population. Poor experience of the Scheme may also result in additional funding requirements towards any deficit that arises.

Maturity Analysis of the Liability:

The weighted average duration of the liability as at 30 September 2022 is 0.44 (2021: 0.15).

24. Post employment benefit obligations/(asset) (continued)

(b) Defined benefit retirement scheme (continued)

Scheme assets

The scheme assets are managed by ICEA Lion Asset Management Limited. The composition of the assets was as follows:

	2022		2022 20		2022 2021		2021	
	Shs'000	%	Shs'000	%				
Government securities	351,266	69.4	318,205	64.9				
Quoted equities	99,193	19.6	123,284	25.1				
Cash and contributions due	2,233	0.4	2,145	0.4				
Money market	53,292	10.6	46,949	9.6				
	505,984	100.0	490,583	100.0				

Other post employment benefit obligations

The group and company also contribute to a defined contribution retirement benefit scheme for certain non-unionisable employees. The contributions which have been charged to profit or loss are as below:

	Gro	Group		oany		
	2022 2021		2022 2021 2022		2022	2021
	Shs'000	Shs'000	Shs'000	Shs'000		
Defined contribution benefit scheme	7,375	6,681	2,334	2,371		

The group and company also make contributions to a statutory provident fund, the National Social Security Fund. Contributions are determined by local statute and are shared between the employer and employee. The contributions which have been charged to profit or loss are as below:

	Group		Company	
	2022 Shs'000	2021 Shs'000	2022 Shs'000	2021 Shs'000
National Social Security Fund	60,347	53,714	2,794	2,394

25. Borrowings

	Grou	ір	Company	
	2022	2021	2022	2021
	Shs'000	Shs'000	Shs'000	Shs'000
Bank overdrafts	156,132	73,543	-	-
Bank loans	113,938	185,959	-	-
Other borrowings	13,662	12,236	13,662	12,236
Total borrowings	283,732	271,738	13,662	12,236
Less current portion	(221,766)	(139,402)	(2,421)	-
Non-current portion	61,966	132,336	11,241	12,236
Maturity of non-current borrowings				
Between 1 and 2 years	53,457	65,647	2,732	-
Between 2 and 5 years	5,902	54,453	5,902	-
Between 5 and 10 years	2,607	12,236	2,607	12,236
	61,966	132,336	11,241	12,236

The bank loans and bank overdrafts are secured by a first legal charge and a debenture over certain of the group's immovable properties and other assets and by guarantees given by related companies.

25. Borrowings (continued)

The bank overdrafts and loan balances denominations and effective interest rates are as listed below:

	2022	Effective Interest Rates	2021	Effective Interest Rates
	Shs'000		Shs'000	
Bank overdrafts				
Kenya Shillings	117,522	12.25%	41,321	12.25%
Tanzania Shillings	23,187	16%	15,915	16%
USD	15,423	7%	16,307	7%
	156,132		73,543	
Bank loans				
Euros	84,969	3%	138,310	3%
USD	28,969	8%	47,649	8%
	113,938		185,959	

The Euro loan is for the purpose of construction of a biomass plant at Dwa Estate Limited. The US dollar loan relates to capital expenditure incurred by Amboni Plantations Limited.

Other borrowings relate to a loan denominated in Kenya Shillings with an effective interest rate of 15.5% and is towards replanting costs at Vipingo Estate.

26. Payables and accrued expenses

27.

	Group		Company	
	2022	2021	2022	2021
	Shs'000	Shs'000	Shs'000	Shs'000
Trade payables	73,719	106,129	11,678	15,111
Amount due to related parties (Note 31 (v)	12,341	10,862	2,329	2,003
Provision for leave pay	39,920	42,465	11,000	11,049
Accrued expenses	42,307	136,764	12,777	104,934
Other payables	118,421	46,868	6,139	7,464
	286,708	343,088	43,923	140,561

The payables and accrued expenses are short-term and hence the impact of discounting would be insignificant, thus the carrying amounts approximate to the fair value.

Lease liability	Group		Group Compan	
	2022 Shs'000	2021 Shs'000	2022 Shs'000	2021 Shs'000
Current	7,383	6,162	2,705	2,161
Non-current	28,226	34,058	14,621	15,856
	35,609	40,220	17,326	18,017
Maturity of non-current lease liability				
Between 1 and 2 years	8,735	7,163	3,084	2,475
Between 2 and 5 years	16,660	19,852	11,537	9,656
Between 5 and 10 years	2,831	7,043		3,725
	28,226	34,058	14,621	15,856

27. Lease Liability (continued)

The lease liability denominations and effective interest rates are listed below.

	Gr	Group		any
	2022	2021	2022	2021
	Shs'000	Shs'000	Shs'000	Shs'000
USD	17,326	18,017	17,326	18,017
Kenya Shillings	18,283	22,203		-
	35,609	40,220	17,326	18,017

The effective interest rates on the lease liability at the end of the year ranged between 9.25% to 12.5% (2021: 9.5% to 12.33%).

28. Contingent liabilities

The group companies are defendants in various legal actions relating to industrial accidents and other employment-related legal claims for which provision has not been made in these financial statements as the directors are of the opinion that the possibility of any significant loss is remote.

Certain tax claims have been brought against Dwa Estate Ltd by Kenya Revenue Authority (KRA). In the opinion of the directors, after taking appropriate professional advice, such claims will not result in any significant loss to the company.

29. Commitments

Capital commitments

Commitments for capital expenditure at the end of the reporting period which were not recognised in the financial statements were:

	Group		Company	
	2022 Shs'000	2021 Shs'000	2022 Shs'000	2021 Shs'000
Authorised and contracted for	102,280	135,728	582	2,548

Operating lease commitments

The group as lessee

The future minimum lease payments under non-cancellable operating leases are as follows:

pany
2021
Shs'000
697
2,786
639
4,122

The lease expenditure charged to profit or loss during the year is disclosed in Note 6.

Group as lessor

The group companies are lessors under various agreements with rental receipts and receivables as below;

	2022 Shs'000	2021 Shs'000
Rent received	492	496
Rent receivable		
Within 1 year	375	367
Within 2-5 years	1,821	1,771
Over 5 years	3,801	4,226
	5,997	6,364
